

- General purpose ultrasound probe cover
- Telescopically folded
- High-quality polyethylene, latex-free material
- Sterile, single-use, tear resistant
- Probe cover kits come standard with ultrasound gel
- Box of 25 kits

EDM probe cover kits come in a variety of sizes and configurations to meet your needs. The 12" length is recommended for vascular access procedures and pain management treatments. The 32" and 48" lengths are recommended for anesthesiology (nerve blocks, regional anesthesia) or radiology. For procedures performed in operating room settings, we recommend using the 96" length which covers the cable as well. Kits includes covers, sterile gel (exclusions apply), and elastic bands. Each cover is individually wrapped and sterilized with EO.

Item number	Description	Pckg	Price
101.0015	5.5" x 48" w/ sterile gel	25/box	\$119
